Samir Ibourki

Full stack developer Web & Mobile

(+212) 6 89 94 66 87 | samiribourki7@gmail.com | GitHub | Linkedin | Portfolio

Full Stack Web & Mobile Developer, specializing in building high-performance applications within the JavaScript ecosystem (React Native ,React Js, Node.js, Express). Passionate, rigorous, and solution-oriented, I am actively seeking an opportunity to contribute to innovative projects within a dynamic team.

Technical Skills

Technologies : HTML5 ,CSS , JavaScript (ES6+)
Frameworks & Libraries : React JS, React Native, Expo, Tailwind CSS, Express jS, React Query, Node js, PostgreSQL, GraphQL
Version Control Tools: Git , GitHub,
DevOps / Deployment: Docker , CI/CD
Project Management Methodologies & Tools: Jira**,** Agile Methods (Scrum,Kanban) , Collaborative Work

---

Professional Experience

Front-End Developer Intern : S B Solutions MA, Casablanca **18/02/2026 - 13/05/2026**

- Contributed to the development of **RiLyQueue**, a production-ready MVP solution designed for on-demand service management (missions, queue management, and administrative errands), within the Frontend/Admin team.
- Designed and developed the architecture of the admin dashboard using React.js and Tailwind CSS, applying a modular, scalable, and maintainable approach.
- Integrated and optimized communication with REST APIs using React Query and Axios, ensuring high-performance data synchronization for missions, agents, disputes, and payments.

Projects Completed

AgramBio Store E-commerce : **09/04/2026 - 12/05/2026**

- First freelance project focused on the digital transformation of a Moroccan cooperative specializing in natural products (argan oil, honey, amlou). The project involved designing a modern e-commerce platform to support the transition from traditional sales operations to a scalable and optimized digital commerce experience.
- Designed and developed a headless e-commerce architecture with a complete separation between frontend and backend (**Frontend** : React.js / **Backend** : WordPress + WooCommerce API).
- Integrated and consumed **WooCommerce REST APIs** for product, order, and authentication management, while building a modern and responsive user interface.
- Explored advanced technical approaches related to **Headless CMS** and initiated **GraphQL integration** for more flexible data flows.
- **Technologies used** : React.js, Tailwind CSS, GSAP, React Query, WordPress, WooCommerce API, REST API, GraphQL

JobNearMe App : **23/10/2025 - 30/01/2026**

- Innovative mobile application for local job searching based on geolocation. It aims to democratize access to employment by allowing candidates to apply instantly without requiring a CV or diploma, thereby promoting rapid professional integration in local services.
- Full-Stack architecture and development (Mobile: React Native / Expo, Backend: Node.js / Express). Designed an optimized database using PostgreSQL & Sequelize.
- Deployment of a functional and secure solution (JWT Authentication) providing a smooth user experience for applications and real-time job offer management.
- **Technologies used** : React Native, Expo Router, Zustand, AsyncStorage, Node js , Express, PostgreSQL, Sequelize

---

Education

Simplon Maghreb : Training in Full-Stack Web & Mobile Development **20/09/2025 - 30/01/2026**
IBN Zohr University : Bachelor's Degree in Economics **2023 - 2024**
